# How to compile allegro with Dev-C++:

1. Click on Tools and Compilations Options (the first configuration)

2. Use the compiler a 32-bit to compile the code and click on the Folders tab.

3. Click on Libraries and insert the allegro library path inside the input line (2)

4. Click on Include C and insert the allegro include path inside the input line (2)

5. Repeat the same operation also for Include C++ at point 4.
6. Compile the code.
